Thanks Andra,
Nice to know R-10 can keep headquarters on task
Take care,
Kevin

Kevin and Ken,

I wanted to let you know that I followed up with Pat Childers, the man Kevin most likely heard on the NTAA call. We reminded him that the formal application is moving along and that it typically doesn't go through his office, even though he is the HQ Tribal Coordinator. You could have also heard the Tribal Air Coordinator from R5; he reported on two tribes who are likely going to apply for Class I redesignation but have no formal applications yet.

In any case, I thought it was important to check all the possible sources since I wasn't on the call. The application has been moving along during this time but it seems a few reminders were needed for people at HQ, particularly as they aren't involved in this process.

Thanks for bringing this to our attention.
Andra

Thanks Andra,
I got on the call late due to other commitments but I clearly heard the EPA headquarters gentleman state that they did not have the final submittal form R-10.
Glad to know the application is moving along.
Take care,
Kevin

Subject: NTAA Listening Session correction from EPA

Kevin,

On the NTAA TAC Listening Session yesterday, the R10 Tribal Air Team gave an update on the Kalispel Class I Re-designation, which I drafted. The message said the following: "Kalispel Class I Re-designation: Tribe has submitted to EPA the procedural requirements that tribes must follow prior to proposing redesignation. EPA R10 Tribal Air Team has updated the RA and now in the process of updating HQ on the application."

Instead of "prior to proposing redesignation," the update should have read "for redesignation." We clearly have a formal submittal from the Tribe requesting redesignation and if the Tribe has met all of the procedural requirements, the Region will approve it through notice and comment rulemaking.

I'm sorry for the error and hope you can pass this along to NTAA in order to have a corrected record, in case folks were confused.

Thank you,
Andra
